

MacLay has designed a summer math program for our Middle School students through Khan Academy. This program will highlight opportunities for students to engage in a personalized reinforcement of the skills students have already been practicing throughout the 2021-2022 school year. Research shows that spiraling skills over time and across lessons is a key component to minimizing student learning loss and improving knowledge retention.

The objective of summer math is for students to continue working on math throughout the summer. To ensure this, students are required to complete a **minimum of 70%** within their completed course mastery grade level by the end of summer, **August 10th**. In planning to reach this goal, it is recommended to spend about **60 minutes per week** on Khan Academy math (**twelve minutes per day for five days**).

Signing Up

To sign up for the summer enrichment program, please follow these steps:

1. Sign into your Khan Academy account.

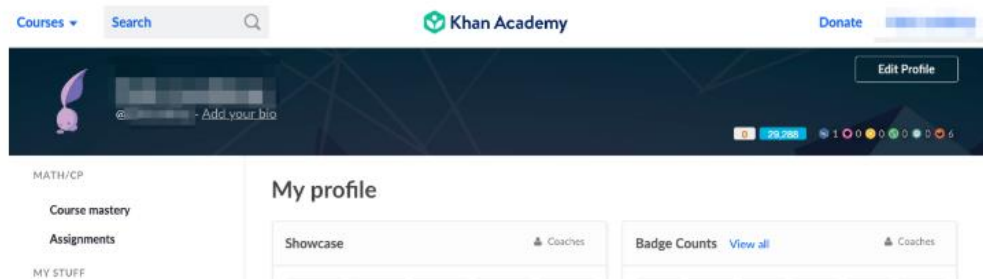

*** Note: If possible, students should use the Khan Academy accounts they have used throughout the school year.*

2. Go to the dashboard. To access this, click your username, located at the top right corner, then select *Learner Home* from the dropdown menu.
3. On the left side, click on *Teachers*.
4. Enter the class code (listed below) that corresponds with your math class.
5. Once the code is entered, the teacher must accept you into their class before the course mastery shows up.
6. Once approved by the teacher, you may begin!

Accessing the Course Mastery Assignments:

1. Once logged in, go to the Khan Academy Front page. This can be found by clicking on “Khan Academy” on the top of the page.
2. On the left side of the front page, the summer class will be listed and under it will be the Course Mastery link. Select that link and begin working towards mastery.
(see image below)

*** Note: Teacher approval must occur before you see the course name displayed.*
